SOC-ICC ANNUAL BUSINESS MEETING- August 16th & 17th

Half Day Classes:

2012 IBC Exit Systems 3.00 Hours 0.3 CEU 2012 International Building Code (IBC): Item#:3000S12

This seminar focuses on IBC Chapter 10 means of egress components that are defined and regulated as exits. These components, defined in Chapter 2, are considered as high-level elements that provide a considerable degree of occupant protection within the means of egress system. The exit discharge provisions will also be discussed.

2012 IBC Fire-Resistance and Hazardous Uses 3.00 Hours 0.3 CEU 2012 International Building Code (IBC): Item#:3000S12

This course identifies the various fire-resistive requirements applicable where hazardous uses are present. Fire-resistance-rated separations are often utilized as required enclosure elements for hazardous materials storage, or accepted as alternatives to required spatial separation. An extensive discussion of control areas as described in the International Building Code (IBC) Section 414.2 is provided. In addition, applicable provisions for Group H occupancies, incidental uses and separated occupancies are addressed. Specific requirements in the 2012 International Fire Code regarding fire-resistance are also covered.

Jay Woodward, Instructor International Code Council

Jay is a Senior Staff Architect with ICC's Business and Product Development department and works out of the Lenexa, Kansas Distribution Center. His primary responsibility is the development of new ICC publications and instructing seminars. Among the publications he has authored or co-authored are the *Significant Changes* books on the IBC, IMC and A117.1 standard, and the recent ICC book *Firestopping, Joint Systems and Dampers*.

With over 30 years of experience in building design, construction, code enforcement and instruction, Jay's experience provides him with the ability to communicate effectively on issues of code application and design for code enforcement personnel as well as architects and designers. Jay has previously served as the secretariat for the ICC A117.1 standard committee, ICC's Energy Conservation Code and the *International Building Code's* fire Safety Code Development committee.
